Multiplayer guide

Thanks to cross-play, it doesn’t matter if you play Party Animals on Xbox or PC, you just need to add your friends inside the game by searching for their nametag.

To access custom mode, simply open the game and select “Custom Game”, where you can join anybody’s lobby or create one on your own. One player in your group should create a Party Animals custom game and then share the name with others in the group

Once in this menu, choose your favorite game mode, map, number of participants and other extra settings.
After you have your lobby pre-made, you can invite anybody:

1. You can invite them through Xbox
2. Via the party animals friend list
3. Giving other players the name of your lobby
   If you are playing with more than one controller on local, press RT to add the 2nd local player
   Once everybody is ready, select START and start the fun!

Remember to have a good time! We hope to see you in our Play Date! Happy gaming
